CONTENTS

Tectonophysics Volume 225

Special Issue: Heat Flow and the Structure of the Lithosphere
(edited by V. Čermák)

Preface 1
Heat flow map of northern and central parts of the Fennoscandian Shield based on geochemical surveys of heat producing elements
I.T. Kukkonen 3
Heat production in the continental crust, part I: data converted from seismic velocities and their attempted interpretation
V. Čermák and L. Bodri 15
Heat production in the continental lithosphere, part II: variational approach
L. Bodri and V. Čermák 29
The thermal regime of a three-dimensional subducting lithospheric slab and its electromagnetic response: a numerical model
F.W. Jones, F. Pascal and M.E. Ertman 35
Correlation between the depth to the lower-crustal high conductive layer and heat flow in the Canadian Cordillera
J.A. Majorowicz, D.I. Gough and T.J. Lewis 49
Crustal reflectors, metamorphic reactions and crustal temperatures in the southern Canadian Cordillera
T.J. Lewis, W.H. Bentkowski and R.D. Hyndman 57
Earthquake cutoff depth as a possible geothermometer— applications to central Japan
B. Bodri and S. Iizuka 63
Lithospheric thickness and velocity anisotropy—seismological and geothermal aspects
V. Babuška and J. Plomerová 79
Kinematics and tectonothermal modeling—interpretation of heat flow observed on the Tibetan Plateau
S. Xianjie 91
Paleo heat flow of eastern Canada's passive margins
Y. Hamdani and J.-C. Mareschal 107
Heat flow and geothermal processes in Iceland
Ó.G. Flóvenz and K. Sæmundsson 123

Research Papers
Plio-Pleistocene arc magmatism controlled by two overlapping subducted plates, central Japan
S. Shimizu and T. Itaya 139
Two-dimensional thermal modelling of normal faulting: the Simplon Fault Zone, Central Alps, Switzerland
B. Grasemann and N.S. Mancktelow 155
Shear wave velocity structure below the Iberian Peninsula as obtained by a detailed analysis of surface waves
J. Badal, V. Corchete, G. Payo, J.A. Canas and L. Pujades 167
A study on the active crustal deformation of the North and East Anatolian Fault Zones
A.A. Kiratzi 191
Seismic evidence for anomalous crustal structure beneath Mesozoic fracture zones in the Gambia Basin, eastern equatorial Atlantic
F. Spathopoulos and E.J.W. Jones 205
Source parameters of two rift-associated intraplate earthquakes in peninsular India: the Bhadrachalam earthquake of April 13, 1969 and the Broach earthquake of March 23, 1970
W.-Y. Chung 219
Correlation of strain and the anisotropy of magnetic susceptibility in the Onaping Formation: evidence for a near-circular origin of the Sudbury Basin
A.M. Hirt, W. Lowrie, W.S. Clendenen and R. Kligfield 231
Reconciling deep seismic refraction and reflection data from the Grenvillian–Appalachian boundary in western New England
S. Hughes, J.H. Luetgert and N.I. Christensen 255

Contemporary tectonics, seismicity, and potential earthquake sources in the White Mountains seismic gap, west-central Nevada and east-central California, USA
C.M. dePolo, W.A. Peppin and P.A. Johnson 271
Crustal structure of the central graben of the Midcontinent Rift beneath Lake Superior
J. Shay and A. Tréhu 301
The upper mantle beneath the continental rift of Tanlu, Eastern China: evidence for the intra-lithospheric shear zones
Y.-G. Xu, J.V. Ross and J.-C.C. Mercier 337
The South Siberia–Central Mongolia transect
Yu.A. Zorin, V.G. Belichenko, E.Kh. Turutanov, V.M. Kozhevnikov, S.V. Ruzhentsev, A.B. Dergunov, I.B. Filippova, O. Tomurtogoo, N. Arvisbaatar, Ts. Bayasgalan, Ch. Biambaa and P. Khosbayar 361
Counter-clockwise rotations in the southern Apennines during the Pleistocene: paleomagnetic evidence from the Matera area
P.J.J. Scheepers, C.G. Langereis and F.J. Hilgen 379
The remagnetization of Devono-Carboniferous sediments from the Ardenno-Rhenish Massif
H.P. Thominski, J. Wohlenberg and U. Bleil 411
Isotopic ages from the Nelson region of South Island New Zealand: crustal structure and definition of the Median Tectonic Zone
D.L. Kimbrough, A.J. Tulloch, E. Geary, D.S. Coombs and C.A. Landis 433
Fold interference structures in thrust systems
S.A. Stewart 449
The effective viscosity of rocksalt: implementation of steady-state creep laws in numerical models of salt diapirism
P.E. van Keken, C.J. Spiers, A.P. van den Berg and E.J. Muyzert 457
Fabric changes and their influence on P-wave velocity patterns—examples from a polyphase deformed orthogneiss
S. Siegesmund, A. Vollbrecht and Z. Pros 477
Seismites in the fluviatile Bima sandstones: identification of paleoseisms and discussion of their magnitudes in a Cretaceous synsedimentary strike-slip basin (Upper Benue, Nigeria)
M. Guiraud and J.-C. Plaziat 493
Depth-dependent seismic attenuation in Western Greece
G.-A. Tselentis 523
Seismicity and plate deformation below the Andaman arc, northeastern Indian Ocean
S. Dasgupta and M. Mukhopadhyay 529
Estimation of the regional Bouguer gravity field over the Indian peninsula using two-dimensional filtering
N.K. Thakur, N. Nagarajan and M.S. Joshi 543

Errata
A statistical analysis of the spatial association of seismicity with drainage patterns and magnetic anomalies in western Quebec
A.K. Goodacre, G.F. Bonham-Carter, F.P. Agterberg and D.F. Wright 551
The thermal blanketing effect of sediments on the rate and amount of subsidence in sedimentary basins formed by extension
Y.K. Zhang 551
Cenozoic volcanism in Western Senegal and its relationship to the opening of the Central Atlantic Ocean
P.G. Lo, A. Dia and A.B. Kampunzu 551
